DETAILED ACTION

Response to Arguments

Applicant's arguments filed 1-28-2008 have been fully considered but they are not persuasive.

1. The applicant argues the prior art does not reject the claims (eg. 23-24). The examiner must give the claims their broadest reasonable interpretation. Claim 23 merely states that the mobile is capable of receiving a message from BTS that reduced slot cycle mode is disabled (based on a determination of the traffic monitor).

2. Mangal teaches changing to/from different slot cycle modes (based on, at least, a preprogramming of the phone). Brilla teaches the BTS commanding the phone to different modes while Chuah teaches the BTS sending commands to the phone based on "traffic monitoring" (eg. determines if there is congestion, etc).

Hence the examiner believes prior art fully combines to read on the claims and presents motivation that one skilled would either pre-program the phone (or have the BTS send commands in real-time) depending upon network/traffic conditions that are monitored.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
